

Empowering Federal Healthcare Agencies to Achieve Transparency, Accountability, and Results

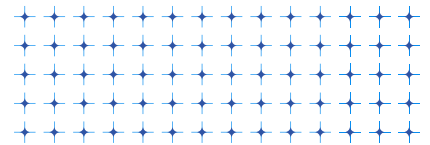

Mission-enabling solutions that strengthen program integrity, expand network access to high-quality care, reduce fraud, waste, and abuse, and deliver measurable results

Federal healthcare agencies operate in an environment of heightened scrutiny, evolving market dynamics, and persistent pressure to do more with less. As budgets fluctuate and oversight increases, agencies must demonstrate transparency, accountability and sound financial stewardship, all while actively reducing fraud, waste, and abuse and safeguarding beneficiary access and care quality.

Claritev works with agencies to help them navigate change confidently, combining data, analytics, and operational expertise to help them strengthen program integrity, improve access to care, and achieve sustainable cost efficiencies.

Empowering Programs to Endure and Thrive with Innovative Tools for Mission-Critical Work

Our solutions help agencies achieve mission outcomes while equipping them with the services, data, and analytics needed to demonstrate measurable impact, maintain program stability, and respond effectively to market shifts.

PAYMENT REVENUE & INTEGRITY SOLUTIONS

Comprehensive pre-payment and post-payment solutions that identify improper billing patterns, detect and help prevent fraud, waste and abuse, all designed to work within federal regulatory frameworks with minimal provider abrasion.

- Advanced Code Editing (ACE) uses sophisticated analytics across 30+million code combinations
- The Coordination of Benefits (COB) solution helps to maximize recoveries for accurate payment responsibility

NETWORK SOLUTIONS

NCQA-accredited national PPO network comprised of 1.4 million healthcare providers with pre-payment integrity services integrated into the network delivery model to support identification of potentially improper billing prior to payment.

Flexible network design enables seamless beneficiary access while achieving significant cost savings.

- 43% average savings for practitioner claims
- 26% average savings for outpatient claims
- 29% average savings for inpatient claims
- 47% average savings for ancillary claims

DATA & ANALYTICS SOLUTIONS

Advanced data and analytics that deliver predictive insights, risk analytics, and comprehensive reporting for data-driven decision-making. Cutting edge solutions powered by the technology expertise to support federal agencies in demonstrating program effectiveness with confidence.

- BenInsights® unites clinical and financial data for holistic visibility into plan performance, enabling data-driven cost management and operational efficiency for demonstrable fiduciary compliance

Risk Analytics provides interpretable risk models early, after claims adjudication, to help employer groups create more precise and prioritized strategies with Predictive Risk Scores and Condition Risk Scoring.

PRICE TRANSPARENCY & MARKET INTELLIGENCE

Claritev has one of the most robust and comprehensive price transparency databases on the market with 140B+ records across payor and hospital Machine Readable Files (“MRF”), cleansed, enriched, and contextualized monthly. Claritev’s proprietary database has the power to deliver actionable intelligence that goes beyond publicly available MRFs.

- Medicare benchmarking and Data Usability Rating provide rich data context and intelligence.

Outlier detection and market intelligence help transform price transparency data into cost management capabilities and strategic resource allocation.

Building Trust Through Transparency, Accountability, and Adaptable Capabilities

Claritev understands the constraints and complexity of the public healthcare sector. With proven solutions and approaches that strengthen program integrity, demonstrate results, and eliminate waste, Claritev equips agencies with solutions to help them accomplish more with the resources they have. Transformation never stops, and Claritev is the mission enabler that empowers agencies with flexibility and adaptable technology capabilities to meet challenges as they emerge.
